- Quick to install
- Smooth and easy to use
- Supplied ready made

Overview

This modern stylish pleated screen is perfect for Bi-fold doors, Multi-panel sliding door, large sliding doors, outdoor rooms or on openings up to 3.7m high x 9.2m wide. The semitransparent mesh is designed to maximize ventilation without compromising the view.

Monarch Glide incorporates Seiki's wide screen technology, allowing the screen to span greater distance and yet maintain a high level of insect protection. The screen operates easily, allowing the user to gently slide the screen to any position along the opening due to the unique cord operating system.

The cords system, combined with our unique mesh retention clips, hold the mesh in position during windy conditions. When not in use, the mesh stores neatly to the side of the door opening.

Size Range

Single Slide **Max: 3700mm high x 4600mm wide**

Double Slide **Max: 3700mm high x 9200mm wide**

Standard Colours

Black ~ White ~ Sahara Woodgrain Powder Coat ~ Matt Natural Anodised

- Fiberglass Mesh
- Zipper mesh retaining system
- Remote control or Smart App operation
- Long life USB charged battery
- Removable mesh for easy cleaning
- Strong resistance to wind
- Fast simple installation
- Smooth and easy to use
- Supplied ready made

Overview

This flat mesh retractable screen is the perfect choice for locations with higher than usual winds. The mesh is held securely in the guide rail by a concealed zipper ensuring it holds firm in windy conditions.

Ez-Zip's features concealed speed adjustment with a soft-closing damper that gently guides the screen back into the protective housing when not in use. The mesh cartridge can be easily removed for cleaning or replacement if required.

Ez-Zip's long-life battery is concealed inside the motor; the USB charger port is discreetly concealed inside the frame. Charging can last up to 6 months depending on frequency of use.

Ez-Zip is ideally suited for installation on awning/casement windows, bi-fold serveries, and gas-strut windows. The screen is designed to be face or recess mounted using screws, double-sided adhesive tape or magnetic tape.
